

## TESTIMONIAL

Employee: Sartaj Hundal

Birth date: December 17<sup>th</sup>, 1991

Title and period of employment: Consultant, Data & Analytics / October 10<sup>th</sup>, 2022, until April 3<sup>rd</sup>, 2023

### Assignments:

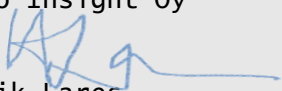

Sartaj Hundal has worked as a consultant and developer at Kaito in the data analytics team. His responsibilities have included conducting functional analyses, requirements gathering, use case identification, and suggesting target architectures for data warehouse modernization and data sharing projects. He has also participated in online analytical processing with tools such as SQL and dbt, that optimize statistical efficiency and quality of the deliverables in Kaito's customer assignments.

Furthermore, Sartaj has participated in developing Kaito's Fast Track approach, which offers customers a pre-configured data platform as a productized service. Sartaj was involved, among other things, in creating boilerplate from legacy RDBMS for financial analytics, based on which data modelling templates were built using Kimball methodologies.

### Assessment:

Sartaj has performed his job with good quality, conscientiously and always on schedule. He performs tasks with accuracy and attention to detail. Thanks to his cooperation and interaction skills, Sartaj has been well-liked among colleagues. I'm happy to recommend Sartaj Hundal for any similar position.
